Blue Tongue Galvanized Deluxe Camper

The Blue Tongue Galvanized Deluxe Camper would arguably be one of the best value for money off road camper trailers on the market. This camper is uniquely designed with loads of storage, durability and style in mind and built in Australia. It is built tough to take you to any destination you like. It has a massive integrated slide out storage box to fit a fridge/freezer and generator or just more storage for your camp gear. There's side opening doors to

the trailer with another slide out drawer, room for 3 jerry cans, rear mounted spare wheel. The Galvanized Deluxe comes with a host of inclusions but you can upgrade a couple of features to make it uniquely yours.

The canvas used in our tents has been developed specifically for our Blue Tongue Campers. Our roof canvas is made from Duoproof 1200™ 470gsm canvas with a

Silver Polyurethane UV stop to the underside. The wall canvas is made from Duoproof 1000™ 420gsm canvas. After weaving, the fabric is rolled under pressure to accept the silver coating that blocks out more than 98% of UV radiation and heat. The technology used in this protective coating has been developed to provide a level of finish is rarely used in a canvas product.
